Hello Mr. Wiseman,

The package is getting very close to ready to release to you and post on the website. We're being very careful to be thorough and correct in the information we're providing. The team has done great work over the last 2 months evaluating additional fixtures that meet our goal of being a dark sky community while meeting regulations and project specs.

Coming soon!  
Regina

Ms. Wheeler,

Tomorrow will mark one week since your offer to share details of the LED street light specifications. Are these documents ready?

Given the aggressive schedule for selecting LED street lights, even a one week delay is a significant amount of time.

Please let us know when we can expect to see detailed specifications for the project.

Thank you,  
Ollie Eisman

Ms. Wheeler,

Thank you for that list but I was hoping for more detailed project specifications.

It appears you have carefully analyzed LED lighting options based on some well-defined requirements. I think we'd all like to have detailed project requirements/specifications and related analyses as a reference while we are in this critical decision making phase – not after the fact. That would be extremely helpful and eliminate a lot of confusion. Perhaps you can direct me to these documents, RFPs, etc. Are they online? Given how much money is allocated for this project and how it impacts almost everyone in Santa Fe, I would assume these documents are part of the public record.
